Introduction

Congratulations on purchasing TR-D7251WDIR2W IP camera.  
Please read User Manual before using the camera.

Key features

- Supports H.265+ codec
- Wide Dynamic Range (Real WDR 120dB)
- IR range up to 20 m
- Built-in video archive (Edge Storage) – local recording on MicroSD card\* up to 128GB
- Built-in microphone and speaker)
- Data transfer via Ethernet or WiFi
- TCP/IP, HTTP, FTP, DHCP, DNS, DDNS, RTP, RTSP, RTCP, PPPoE, UPnP, SMTP, NTP, Onvif protocols
- IVS: Human detection; Line crossing; Intrusion detection; People counting; Loitering; Vehicle detection
- Power supply 12V DC or PoE

\* MicroSD Card is not included into camera package

Camera pakage

- 1. IP camera ..... 1 pc.
- 2. User Manual ..... 1 pc.
- 3. Mounting kit ..... 1 pc.
- 4. Bracket ..... 1 pc.

Attention!

The power supply should meet the following requirements: output voltage, current, polarity, and working temperature. When using the camera in thunderstorm conditions, make sure there is a lightning rod or unplug the power connector.  
Pay attention to the temperature requirements for IP camera operation. Avoid using the device in excessively high or low temperatures. Do not install the camera near heaters. Do not point the camera lens at the sun or at bright objects as this can damage the image sensor.

Quick start

1. Plug in the power adapter from the package. The camera will turn on in a minute.
2. Create your user account at [cloud.trassir.com](http://cloud.trassir.com).
3. Download TRASSIR app from Google Play or AppStore.
4. Launch TRASSIR app and sign in to your account.
5. *Settings > Add camera > TRASSIR >*  
then follow the instructions in the application.

\* IP cam's WiFi password: 12345678

LEDs on camera

|-----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>POWER (red)</b>    | On: There is power on camera<br>Off: There is no power on camera                                                                                               |
| <b>STATUS (green)</b> | Blinks frequently every 0.5 sec: camera is ready for WiFi setup<br>Blinks rarely every 1.5 sec: camera is connected to WiFi<br>On: camera is connected to WiFi |
| <b>LINK (blue)</b>    | On or blinks: LAN cable is connected<br>Off: LAN cable is not connected                                                                                        |

Dimensions

Manual setting of network parameters

In order to connect to the IP camera, the PC should be in the same local network as the camera. The IP address of the camera, the PC and any other device on the network should not match.

The IP camera has the following default settings:

- IP address: 192.168.1.188
- Subnet mask: 255.255.0.0
- Gateway: 192.168.1.1
- HTTP-port: 80
- username: admin
- password: admin

PC network settings example:

- IP address: 192.168.1.10;
- Subnet mask: 255.255.0.0.

There are 3 options to set up your camera:

1. Change IP address of a camera manually.  
Start your browser, connect to IP camera and enter your username and password. Choose appropriate menu item and change network settings of IP camera.
2. Set up camera IP address using fast configuration utility that can be downloaded from [www.trassir.com](http://www.trassir.com).
3. Change IP camera settings using TRASSIR professional software.

You can find detailed camera settings instructions in User Manual that can be downloaded from [trassir.com](http://trassir.com).
